What is this product?

Type

UBS (Irl) ETF Plc is an umbrella investment company with variable capital and segregated liability between sub-funds incorporated in Ireland and authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities under the UCITS Regulations. The fund is a UCITS ETF.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.
The recommended holding period (RHP) is displayed in the section "How long should I hold it and can I take money out early?".

Objectives

The Fund is passively managed and seeks to track performance of the S&P 500 ESG Index (Net Return) (the 'Index'). The Index is an equity Index calculated, maintained and published by international Index supplier S&P Indices and is denominated in USD. It tracks the movements of the 500 leading companies listed on markets in the USA but available to investors globally. The Index is a broad-based, market cap-weighted index that is designed to generate exposure to best-in-class environmental, social and governance ('ESG') US based companies while avoiding those with low ESG characteristics. This best-in-class approach excludes at least 20% of the least well-rated securities as against the standard index universe. The Fund does not benefit from an SRI label. In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may, for the purpose of reducing risk, reducing costs or generating additional capital or income, use derivative instruments. The use of derivative instruments may multiply the gains or losses made by the Fund on given investment or on its investments generally.
Currency hedged share classes may also be available in the Fund.
This sub-fund promotes environmental and/or social characteristics but does not have a sustainable investment objective.
The Fund will not enter into any securities lending.
The return of the fund depends mainly on the performance of the tracked index.
Fund income is not paid out, but instead will be reinvested.

The fund is suited to be acquired by the target client segments without any restriction of the distribution channel or platform.

What happens if UBS Fund Management (Ireland) Limited is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to State Street Custodial Services (Ireland) Limited as depositary of the Fund, which is responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost.
