Term

This product is an open-ended fund without predefined maturity. For information on redemption possibilities please refer to section "How long should I hold it and can I take out my money early?". Objectives

The fund is passively managed. The aim is for your investment to reflect the performance of the MSCI Thailand TRN Index (index) which is designed to reflect the performance of the listed shares of certain companies from Thailand that are available to investors worldwide. This may include both common and preference shares. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced at least quarterly. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 2 per cent. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. This fund is a sub-fund of Xtrackers for which the prospectus and the periodic reports are prepared as a whole. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. More share classes may be available for this fund - please refer to the relevant section of the prospectus for further details. You are not permitted to exchange your shares in this fund for other funds of Xtrackers. The depositary is State Street Bank International GmbH, Luxembourg Branch. On the insolvency or default of the depositary State Street Bank International GmbH, Luxembourg Branch securities held by the depositary on behalf of the fund should be protected but the fund may suffer loss in relation to cash and certain other assets which are not protected.
