What is this product?

Type

The product is a UCITS sub-fund of an open-ended investment company with variable capital under the laws of Ireland. The fund is a UCITS ETF.

Term

This product is an open-ended fund without predefined maturity. You may request the redemption of shares generally on each valuation date. The company may, however, suspend the redemption if extraordinary circumstances appear to make this necessary, taking into account the interests of the investors. Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The 1C share class of Xtrackers Future Mobility UCITS ETF was launched in 2019.

Objectives

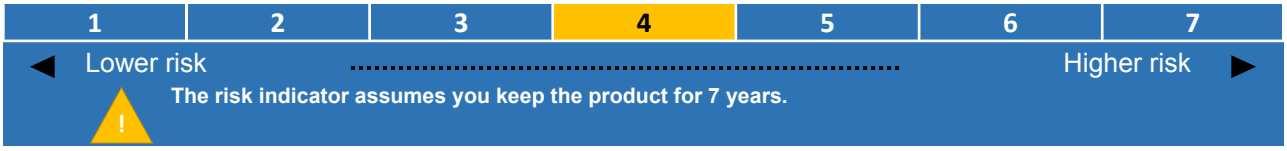

The fund is passively managed. The fund promotes environmental and social characteristics and is subject to the disclosure requirements of a financial product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. More ESG information is available in the sales prospectus and supplement and on the DWS website. INVESTMENT OBJECTIVE: The aim is for your investment to track the performance before fees and expenses of the Nasdaq Global Future Mobility Index (index). DESCRIPTION OF INDEX: The index is designed to reflect the performance of the shares of companies from global developed and emerging markets that have material exposure to themes related to future mobility that meet certain environmental, social and governance (ESG) criteria. Nasdaq applies a screening and analysis process to identify index constituents. This process includes but is not limited to, analysing patent data, market size, trading volume, market listing and foreign ownership restrictions. ESG CRITERIA: The index utilises ESG data from a third party data provider. Constituents which breach certain ESG criteria, as disclosed in the prospectus and/or supplement, are excluded. Up to 100 securities with the highest Intensity Score and highest average Contribution Score meeting the ESG criteria are then selected for inclusion in the index. INDEX REBALANCING, CALCULATION AND ADMINISTRATION: The index follows a market capitalization-weighting approach and individual securities are capped at 4.5% at each semi-annual rebalancing. The index is calculated on a total return net basis. This means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced semi-annually and may also be rebalanced at other times in order to reflect corporate activity such as mergers and acquisitions. The index is calculated in US Dollars on a daily basis. INVESTMENT POLICY: To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund. FURTHER INFORMATION: Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 2 per cent. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. This fund is a sub-fund of Xtrackers (IE) plc for which the sales prospectus and the periodic reports are prepared as a whole in addition to individual supplements per sub-fund. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 82% of the associated revenue, the securities lending agent, which will be a Deutsche Bank entity, will be allocated 9% and the remaining 9% will be allocated to the DWS entity which monitors such activities, as set out in the sales prospectus and/or supplement, for its own coordination and oversight tasks.
