Further, the company may restrict the redemption. The product may be redeemed early in certain circumstances as set out in the sales prospectus. The 1C share class of Xtrackers MSCI Europe Industrials ESG Screened UCITS ETF was launched in 2007.

Objectives

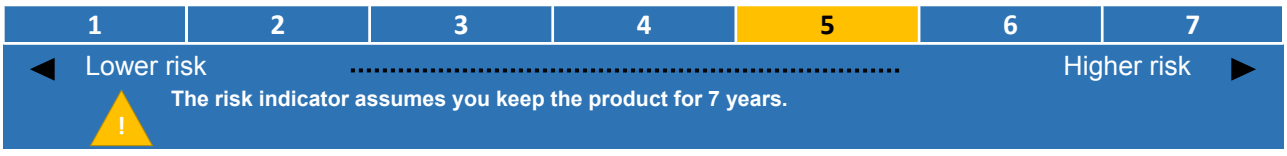

The fund is passively managed. The fund promotes environmental and social characteristics and is subject to the disclosure requirements of a financial product in accordance with article 8(1) of Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector. More ESG information is available in the sales prospectus and on the DWS website. INVESTMENT OBJECTIVE: The aim is for your investment to reflect the performance of the MSCI Europe Industrials ESG Screened 20-35 Select Index (index). DESCRIPTION OF INDEX: The index is based on the MSCI Europe Industrials Index (Parent Index), which is designed to reflect the performance of shares in large and medium capitalisation companies across certain developed markets in Europe which are classified in the industrials sector as per the Global Industry Classification Standard®. In order to be eligible for inclusion in the index, companies must be eligible for inclusion in the Parent Index and must meet certain ESG screening criteria. ESG CRITERIA: Securities which breach certain ESG standards, as disclosed in the prospectus and/or supplement, are excluded. The index also includes a carbon emission reduction rule, whereby if having applied the above exclusions, the Greenhouse Gas ("GHG") intensity of the index has been insufficiently reduced compared to the Parent Index, constituents are excluded by descending order of GHG intensity until a relevant reduction threshold is achieved. The weight of the largest group entity in the index is capped at 31.5% and the weights of all other entities are capped at 18% at each quarterly index rebalancing. Where the largest group entity has exceeded 35% or any other entity has exceeded 20% in the lead up to each month-end, such entities will be rebalanced to 31.5% and 18% respectively. INDEX REBALANCING, CALCULATION AND ADMINISTRATION: The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on at least a quarterly basis. The index is calculated in Euros on a daily basis. INVESTMENT POLICY: To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties subject to certain ESG criteria to generate additional income to offset the costs of the fund. FURTHER INFORMATION: Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. This fund is a sub-fund of Xtrackers for which the sales prospectus and the periodic reports are prepared as a whole. The assets and liabilities of each sub-fund are segregated by law. As a result, assets of one sub-fund are not available in the event of claims against or insolvency of another. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed: In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario. 10.000 EUR is invested.

To the extent the fund undertakes securities lending to generate revenue, the fund will ultimately be allocated 82% of the associated revenue, the securities lending agent, which will be a Deutsche Bank entity, will be allocated 9% and the remaining 9% will be allocated to the DWS entity which monitors such activities, as set out in the sales prospectus and/or supplement, for its own coordination and oversight tasks.
