What is this Product?

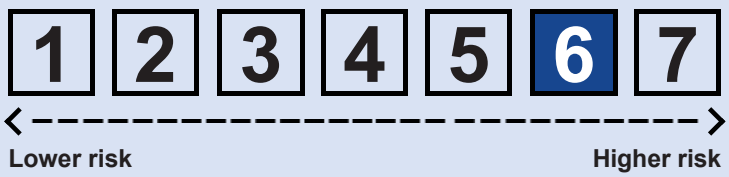

Type: The Product is a UCITS sub-fund of the Manufacturer, an umbrella fund structure comprising different sub-funds. The Product is authorized in Ireland and regulated by the Central Bank of Ireland (CBI). Under Irish law, the Manufacturer has segregated liability between its sub-funds. While the Key Information Document is drafted on the level of each sub-fund, Prospectus and Financial Reports are drawn up on the level of the Manufacturer. The Management Company does currently not offer an exchange of shares for shares of another sub-fund.

Term: No fixed term. We are entitled to terminate the management of the Product by giving at least one month notice to investors as published at least on our website.

Objective: The Product's investment objective is to track, before fees and expenses, the price and yield performance of the MVIS Global Junior Gold Miners Index (the "Index").
In order to seek to achieve its investment objective, the investment policy of the Product is to invest in a portfolio of equity securities that as far as possible and practicable consists of all or substantially all of the component securities of the Index. The Index includes companies that generate at least 50% of their revenues from (or, in certain circumstances, have at least 50% of their assets related to) gold mining and/or silver mining or have mining projects with the potential to generate at least 50% of their revenues from gold and/or silver when developed. Such companies may include smaller companies and foreign issuers. At each quarterly review, the Index limits the maximum weight of any single stock to 8%.
The Product invests in the underlying (physical) securities that make up the Index and does not take part in securities lending.
The Product, using a "passive" or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Investment Manager will regularly monitor the Product's tracking accuracy. The annualised tracking error envisaged is not anticipated to exceed 1.0% under normal market conditions.
Dealing Frequency: You may purchase and redeem shares in this Product on a daily basis and in accordance with the relevant notice period.
• Product's base currency: U.S. Dollar
• Distribution policy: Income accumulated

Intended Retail Investor: This Product is intended for all kinds of investors who are looking for capital growth and/or optimization and have an investment horizon which is at least equal to the recommended holding period shown below. Only those investors who have the ability to make an informed decision based on sufficient knowledge and understanding of the Product and the market and the ability to bear a loss up to a total loss of their investment should consider investing in the Product. The Product does not offer a capital guarantee.

What are the risks and what could I get in return?

The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you. We have classified this Product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at a high level and poor market conditions are very likely to to impact the capacity of VanEck UCITS ETFs plc to pay you. **Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies.** This Product does not include any protection from future market performance so you could lose some or all of your investment. The following risk may be materially relevant to the Product but may not be adequately captured by the summary risk indicator and may cause additional loss: Risk of Investing in Natural Resources Companies, Concentration Risk and Risk of Investing in Small- and Medium-Capitalization Companies as further described in the Prospectus.

Performance scenarios and the assumptions made to produce them:

What you will get from this Product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period: 5 years. Example Investment: USD 10,000			
Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	***There is no minimum guaranteed return. You could lose some or all of your investment.***		
Stress	***What you might get back after costs***	USD 950	USD 510
	Average return each year	-90.51 %	-44.84 %
Unfavourable	***What you might get back after costs***	USD 3,600	USD 2,310
	Average return each year	-64.01 %	-25.37 %
Moderate	***What you might get back after costs***	USD 8,890	USD 10,010
	Average return each year	-11.06 %	0.01 %
Favourable	***What you might get back after costs***	USD 27,650	USD 34,100
	Average return each year	176.49 %	27.81 %

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. Where applicable for the unfavourable, moderate and favourable scenarios: The unfavourable scenario occurred for an investment between June 2021 and November 2022. The moderate scenario occurred for an investment between February 2017 and February 2022. The favourable scenario occurred for an investment between July 2015 and July 2020. Your maximum loss would be that you will lose all your investment.

What happens if VanEck UCITS ETFs plc is unable to pay out?

The failure of the Manufacturer has no direct effect on your payout, as the statutory regulation provides that in the event of the insolvency of the Manufacturer, the Product does not become part of the insolvency estate but is maintained in its own right. Fund investments do not fall within the scope of any guarantee or compensation scheme.

What are the costs?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- USD 10 000 is invested

Cost over time		
	If you exit after 1 year	If you exit after 5 years
Total costs	USD 61	USD 303
Annual cost impact (*)	0.6 %	0.6 %

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.6 % before costs and 0.0 % after costs. We may share part of the costs with the person selling you the Product to cover the services they provide to you. They will inform you of the amount.
